## Air-Conditioner Remote Control

### Model Setting of Remote Control

1. Pull side cover of remote control down, Put 2 AAA batteries as per polar indicated on battery cabin.
2. Find the model code from Model Code List. If there are many models for one brand, you have to try the one which is most suitable for your machine. E.g., for SANYO, you should try model code from 035 to 039.
3. Press the set key with sharp stick like a pencil ( You may not press the key at the time of loading batteries.). Model code on LCD will flash, Press model code "+" or "-" key until required model code appears. Then press ENTER key, the model code stops flashing. Aim at air conditioner by pressing ON/OFF key, you can remote control your air conditioner.

### Remote Control Auto Search

If you do not know model of air conditioner and remote control or you cannot find required model from Model Code List, please operate as per the following steps:

1. Press the set key with sharp stick like a pencil, model code on LCD will flash, Let the remote control aim at air conditioner. Press AUTO search key. Press it once, model code adds 1 automatically and emit corresponding ON/OFF signal. Press and release until air conditioner receives signal and produces buzzer sound. Then press ENTER key.
2. After turning on the air conditioner, try other function keys. If they do not work, repeat above steps until it is correct.

### Attention

1. If it is not used for a long time, remove the battery so as to avoid leakage liquid of the battery to damage the machine. When the LCD looks dim, please change batteries (New and old batteries can not be used together). After the batteries are replaced every time, it is necessary to set model code again.
2. If abnormal situation appears because of not correct use, please put pen tip or other thin item into "Reset" hole. Press it to restore normal status. This time it is necessary to set model code again.
3. The manufacturer keeps the right to change the parameter and function of the product.

### Technical Parameters

**Controllable distance :** Large than 8 meters  
**Power supply voltage:** DC 3 V  
**Battery model:** Battery AAA(UM-4, R03)×2  
**Dimension:** L160mm×W58mm×D18mm  
**Weight:** Approx.95g(excl.the batteries)
